ARCHIWARE

Archiware Reveals P5 Version 7.3 Beta and Key Partner Collaborations at IBC 2024

Archiware GmbH, a leading provider of data management software, will be presenting a beta version of its latest P5 data management software version 7.3, and showcasing its partner integrations at IBC Show booth 7.D13. Live demonstrations will highlight key collaborations with ATTO, OWC, Sonnet, and SYMPLY.

Munich, September 12th, 2024 – Archiware is set to release P5 Software Platform version 7.3 in the fourth quarter of 2024, packed with enhanced features designed to improve efficiency. The new Parking Queue enables archive and restore jobs to be held for approval by an operator. Administrators can now save and quickly recall multiple file selections, streamlining workflows. The S3 Object Archive feature supports third-party FTP-style tools like Cyberduck, making data submission and restoration easier via the S3 server interface, offering code-free integration with LTO archives.

Archiware's P5 Archive, P5 Backup, and P5 Synchronize modules are enhanced through integrations with a wide range of hardware and software partners, demonstrated at IBC 2024. A key highlight is SYMPLY's SAS LTO drive connected to a Mac running Archiware P5 via the ATTO SAS to 10GB Ethernet Bridge, offering high-performance workflows for managing large datasets, automating backups, synchronization, and archiving. Sonnet's Thunderbolt to 10Gig Ethernet adapter will also be showcased, providing high-performance connectivity for workstations.

Additionally, OWC's Jellyfish shared storage integrates with Archiware P5, providing customizable solutions for modern NLE systems and high-resolution workflows, offering creative professionals efficient, scalable storage.

This year, Archiware is partnering with 30 hardware and software companies. A detailed IBC Partner Map is available here:

About Archiware:
Thousands of media companies worldwide use Archiware P5 to protect their production and assets. The product line includes:

- **P5 Synchronize**: for replication of time-critical data, to ensure high availability.
- **P5 Backup**: to back up server data to disk, tape, and cloud.
- **P5 Archive**: with MAM-like features, migrating data offline to tape and cloud.
- **P5 Data Mover**: an extension for the P5 Archive module for policy-based moving, copying and tiering of archived data between tape, disk and cloud.

All modules can be combined to create multiple-step security concepts to achieve maximum data protection. Archiware P5 secures data to disk, tape, and cloud and has integrations with numerous MAM/DAM/PAM and storage partners. Headquartered in Munich, Germany, Archiware GmbH is a privately held company with over 22 years of experience in data management software and more than 18,000 licenses sold worldwide.
