ARCHIWARE

Archiware Presents Upcoming P5 Version 7.4 at NAB Show 2025

Archiware, a leading provider of data management software, presents the upcoming P5 Version 7.4 at NAB Show booth SL3705. The latest version introduces new features to optimize data management, security, and efficiency, including an updated dashboard and the P5 Archive DLM for automated data lifecycle management. Live demonstrations showcase partner integrations, including OWC Jellyfish, and axle.ai, as well as MagStor and UNITEX LTO solutions, highlighting media workflows and flexible data management.

Munich, March 26th, 2025 – One of the standout features of Archiware P5 Version 7.4 is a **configurable dashboard** that provides real-time visualization of backup, archive, and synchronization jobs. Users can customize graphs time range and layout. Monitoring even larger setups is sped up considerably. Expanded archiving capabilities enable P5 Archive to store data across up to three storage pools simultaneously.

The P5 Data Mover evolves into **P5 Archive DLM**, incorporating automation tools for managing data throughout its lifecycle. This ensures long-term data integrity across various storage options and includes automated verification over the life-cycle to detect potential issues early. Existing P5 Data Mover customers automatically receive these features with their upgrade. **A 40% discount on P5 Archive DLM is available until December 31, 2025 upon release.**

Additional updates include LTO volume cloning to improve data redundancy, distributed preview generation across multiple clients to optimize workflows, and enhanced cloud synchronization and LTFS exchange for greater storage compatibility.

At NAB Show 2025, Archiware showcases its integrations with over 30 industry-leading partners, designed to optimize media workflows. Featured partners include OWC Jellyfish for seamless shared storage, axle.ai for AI-driven media management (booth SL4830) GB Labs for scalable, high-performance storage (booth SL5705), and QNAP for advanced network-attached storage solutions (booth SL4028). A comprehensive list of Archiware's hardware and software partners at the show is available in the NAB Partner Map: **https://bit.ly/nab-partner-map-2025**

About Archiware

Thousands of media companies worldwide use Archiware P5 to protect their production and assets. The product line includes:
- **P5 Synchronize**: for replication of time-critical data, to ensure high availability.
- **P5 Backup:** to back up server data to disk, tape, and cloud.
- **P5 Archive:** with MAM-like features, migrating data offline to tape and cloud.
- **P5 Data Mover:** an extension for the P5 Archive module for policy-based moving, copying and tiering of archived data between tape, disk and cloud.

All modules can be combined to create multiple-step security concepts to achieve maximum data protection. Archiware P5 secures data to disk, tape, and cloud and has integrations with numerous MAM/DAM/PAM and storage partners. Headquartered in Munich, Germany, Archiware GmbH is a privately held company with over 24 years of experience in data management software and more than 18,000 licenses sold worldwide.
